📇 Profile

Experienced in building modern web for business centric use cases. I am a full-stack developer leaning towards the frontend. Skilled at delivering impactful solutions and eager to drive innovation in my next role.

💼 Professional Experience

Octopolis Technologies Pvt. Ltd.(ApnaKlub), *SDE-1* ⧉   08/2023 – present

Developed and enhanced an internal tool for managing operations, focusing on frontend development with React.js and contributing to backend tasks in Node.js.
- Collaborated with product managers to re-architect systems, boosting revenue and streamlining processes.
- Revamped key modules to improve functionality and user experience.
- Designed and implemented the Tickets system, enabling seamless ticket management for internal teams.
- Optimized the codebase, resulting in a 20% faster load time

Masai School, *Internship* ⧉   08/2022 – 07/2023

Gained hands-on experience in web development, contributing to multiple group and solo projects, including leading two group projects.
- Led two group projects, coordinating tasks and ensuring successful project completion.
- Applied full-stack development techniques to build scalable and responsive web applications.
